PART I. WATER

1. Urban water supply

1.1. Urban water subscribers

As of March 2019, the total number of urban and peri-urban water subscribers increased to 213,326 up from 211,434 connections recorded at the end of December 2018, which represents an increase of 0.89 percent. The 52% of these total connections are in the City of Kigali while 48% of them are distributed in the provinces. This difference is mainly attributed to the fact that, the people or institutions in the provinces consume water supplied by Rural Water Service Providers.
