## PART I. WATER

### 1. Urban water supply

#### 1.1. Urban water subscribers

As of December 2018, the total number of urban water subscribers has slightly decreased from 211,479 to 211,434 connections recorded at the end of September of the year 2018, which represents a decrease of 0.02% due to the fact that some customers are currently supplied by Rural Water Service Providers. The 52% of the total connections are in the City of Kigali while 48% of them are distributed in the provinces. This difference is mainly attributed to the fact that, some people in the provinces consume water supplied by Rural Water Service Providers.

The above table shows that 39.5% of water supplied within all branches was non-revenue water due to meter bursts, leakages and illegal connections. The difference of 582,205m<sup>3</sup> between water produced (13,064,979m<sup>3</sup>) and supplied (12,482,774 m<sup>3</sup>) is an estimated water loss mainly from back washing and network flushing.
