Table 2: List of licensed cleaning companies as of December 2013	8
Table 3: List of licensed companies in solid waste collection and transportation as of December 2013	10

SUMMARY

In summary, this report is composed of Water and Sanitation sector and the period under review is from September to December 2013. Improved drinking water sources as defined by World Health Organization/UNICEF Joint monitoring programme¹ include protected springs, public standpipes, water piped into dwelling/yard, boreholes, protected wells and rain water collection. In Rwanda like in other country, we have different sources of drinking water. However this report shows the statistics of only water supplied by Electricity Water and Sanitation Authority (EWSA). Total number of water subscribers was 127,013 as of December 2013.

In sanitation we have 69 licensed cleaning companies and 7 licensed solid waste collection and transportation companies. In quarter four 2013 there was license revocation of real cleaning company due to its poor performance in solid waste collection and transportation.
